

Communication and language

- Learn a nursery rhyme off by heart to perform to your friends and family.
- Perhaps you can teach your family 'We're going on a Bear Hunt'. Show your grown up how to make bear toast. Remember to use some bossy verbs – toast, spread, put, eat when you're explaining the instructions.

Physical development

- Practice riding your bike on 2 wheels or with stabilisers. Remember to wear your helmet to stay safe!
- Make a sandwich for lunch. Practise spreading butter or jam. Can you cut your sandwich in $\frac{1}{2}$? $\frac{1}{4}$ s?
- A message from Mr Hedeaux (PE Teacher)– Can you learn which hand is your left and which hand is your right?

Reading and Writing

- Every day you need to read or listen to a story at home. This should be 4-5 times a week. Record this in your reading log – then we can give you house points. The more you read, the more house points you earn!
- Practice your key words each time you read. Can you find any in the books your grown up reads to you at bed time?
- Draw your favourite picture from your reading book. Why is it your favourite page? Can you write a sentence about it?
- Rainbow write your key words and tricky words! How many can you write without peeking?

Maths

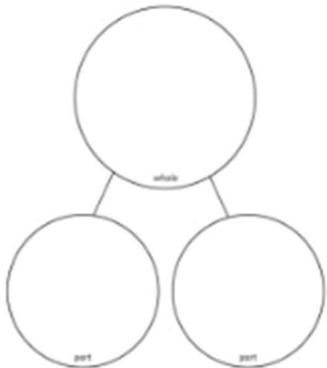

Children will naturally explore 3-D shapes through their block play and modelling. They should be introduced to the names of the shapes and be given opportunities to explore similarities and differences between them and to sort them according to what they notice.

Prompt them to consider which shapes are good for stacking, which will roll and why that is.

They should be given opportunities to construct their own 3-D shapes in different ways.

- Can you write all the pairs of numbers that add together to make 5? Can you use part, part whole to show how you did it? Ask a grown up to draw some part part whole models for you to complete. Challenge: write all the pairs of numbers that make 10/20.

Part-Part-Whole

- Can you print a repeating pattern? Perhaps you can use small objects to create a repeating pattern on the floor?
- Use a weighing scale to bake a cake or make some biscuits. Can you measure out the ingredients? Take a photo or draw it too.

Go on a shape hunt at home, through the cupboards with an adult.

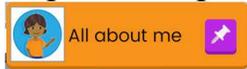

- Play some board games – practise taking turns – remember it's ok to lose, even when you really want to win 😊
- Help with the washing! Fold and put your own clothes away. Perhaps you could even pair up all the socks to help your grown up. Whose socks are the longest? Who has the shortest socks?
- Fill a jar with small objects eg paper clips, lego pieces, small world toys and bring them back to school when you return. We will leave the jars out as part of the continuous provision for your friends to guess how many objects are inside!

The world

- Can you grow your own carrot top plant? Fill a small pot with soil to within 1 inch of the top. Plant the carrot tops in the soil when the roots are about 1 inch long. Dig a hole in the soil with your fingers that is large enough for the carrot top, and plant the top so that it barely sticks up from the soil. Pat the soil down around it.
- What do you need to do to keep your plant healthy?

Computing

- Explore 'Purplemash'. You are brilliant at logging on all by yourself. I have added new pins for you to explore. Press on the

purple pin to see different pins other than the one 'All about me'.

- Ask Mum or Dad to put Mr Thorne's phonics on youtube. Help Geraldine the Giraffe say each sound. Keep practising the sounds that you already know.

Being arty and crafty

- Can you paint a picture of your favourite type of bear? Explore mixing colours – what colours can you make with the paint?
- Maybe you could google how to make a colour wheel?
- Rummage through your recycling. Create your own construction monster. It can be anything you want it to be! Use glue or sellotape to hold pieces together. How tall can you make it? You could draw it or put a photo of it here.

Physical development:

- Create an obstacle course using pillows, cushions and duvets turned into tunnels. Can you complete the obstacle course in 1 minute? Perhaps you could use garden furniture if it's a sunny day.
- Can you cut the letters in your first and second name out of a magazine or newspaper and stick them in your book?
- Go out into the garden and get active! Perhaps you could time how many star jumps, jogging on the spot, stand up/sit downs you can do in one minute. Can you beat your fastest time?
- Can you use an old magazine to cut out all of the food you would need to make a healthy lunch or meal?
 - Get dressed and undressed all by yourself – like you always do at school for PE and swimming.
